SREEJA DAS

New Delhi, India | Email | LinkedIn | GitHub

EDUCATION

SRM Institute of Science & Technology *Aug 2023 – May 2027*
Bachelor of Technology in Computer Science (Core) | **CGPA: 9.05** *Delhi-NCR, India*

TECHNICAL SKILLS

- **Frontend & Animation:** Next.js, React.js, Three.js, React Three Fiber, Framer Motion, GSAP, HTML/CSS, Tailwind CSS
- **Backend & Cloud:** Node.js, Express, PostgreSQL (Neon), Prisma ORM, Firebase
- **Languages:** JavaScript (ES6+), TypeScript, Python, SQL
- **Design & Tools:** UI/UX Prototyping, Git/GitHub, Postman, Capacitor, Vite

EXPERIENCE

The Diecast Store | Live Link *Jan 2026 – Present*
Co-Founder & CTO (July 2026 – Present) · Lead Developer, Freelance (Jan – June 2026) *Remote, India*

- Joined as **Co-Founder & CTO** in July 2026 after building the platform as its freelance lead developer; own the product, technology roadmap and infrastructure.
- Architected a fully functional, serverless full-stack e-commerce platform tailored for diecast hobbyists using Next.js, TypeScript, and Prisma.
- Engineered a premium, responsive UI featuring Bento Grid layouts and fluid animations, successfully integrating production endpoints for payment and shipping gateways (Razorpay/Shiprocket).
- Shipped it as an installable PWA with push notifications; grown to **~70 users**, with a peak of **325 visitors in a single day**.
- Wear many hats beyond engineering: support key client deals alongside our sales co-founder, and lead the brand's creative direction.

Inner Voice (Mental Health AI Startup) *July 2025 – Present*
Founder & Lead Developer *Remote, India*

- Architected a full-stack wellness platform utilizing Next.js and Firebase, designing an anonymous interaction model to ensure secure emotional support and accessible UX.
- Engineered a custom "Trusted Friends" network with complex boundary-setting logic. This feature enables supporters to visually manage their emotional availability and mitigate burnout without explicit refusal.
- Guided the product roadmap with a strong emphasis on UX research, interaction design, and planning migrations to proprietary LLMs.

National Informatics Centre (NIC) *June 2025 – July 2025*
Web Development Intern *New Delhi, India*

- Executed an 8-week internship within the e-Office Project Division, directly contributing to the digitalization of government workflows.
- Evaluated the product suite architecture to identify UI optimizations for secure, large-scale document management systems.

PROJECTS

Photobooth Web App | Live Link *2026*
React 18, Vite, p5.js, GSAP, Capacitor

- Architected a responsive, web-based retro photobooth, enabling users to stack multiple CSS filters, generate automated GIFs, and design custom photo strips.
- Implemented complex asynchronous camera timing and recursive animation logic using GSAP and html2canvas, ensuring seamless UI responsiveness.
- Leveraged Capacitor to wrap the web codebase into a native Android application, delivering a high-performance cross-platform experience.

Christmas Spirit | Live Link *Dec 2025*
JavaScript, Web Audio API, DeviceMotionEvent

- Engineered an interactive web app featuring real-time microphone-triggered snowfall effects and cross-platform motion detection.
- Secured a **Top 10 Finish** out of 107 individuals in the 4-hour Girls Leading Tech Hackathon through this creative technical implementation.

ACHIEVEMENTS & CERTIFICATIONS

- **IBM Data Science Professional Certificate:** View Credential – Completed March 2026.
- **NPTEL Certification in Natural Language Processing:** View Credential – Specialized in text processing and semantic analysis.
- **Technical Volunteer (BAJSS):** Mentored 20+ adolescent girls in coding (Scratch, VSCode) and digital literacy.
